FROM: Jacki Bacharach, Executive Director

RE: Stormwater Funding Measure Advisory Committee

Adherence to the Strategic Plan:

GOAL B: Regional Advocacy: Advocate for the interests of the South Bay.

BACKGROUND

I received a request from the LA County Flood Control District to send a member to their new Stormwater Funding Measure Stakeholder Advisory Committee. I didn't know if they wanted a staff member or an elected official and I didn't know how this was different than the committee that Milton Herring and Hany Fangary already sit on.

After some investigating, I found out that an elected official was fine and that Milton hadn't been regularly attending the meetings. By the time I learned all of this, time was short for the first meeting, so I called Hany and asked if he would attend on our behalf. This being before the November election, I asked if he could attend this one meeting, and then I could put the appointment on the agenda to ratify him or we could pick someone else if he wasn't re-elected but at least we would be covered at the meeting.

He agreed to go and I forgot to put this on the last Steering Committee agenda. At the November Board meeting, Hany was correct in saying that I did ask him to attend, but he wasn't officially appointed. My recommendation would be to appoint him since he is interested and there would be continuity with the other stormwater committee that he sits on.

RECOMMENDATION

Officially appoint Hany Fangary to the L.A. Flood Control District's Stormwater Funding Measure Stakeholder Advisory Committee so that the SBCCOG has continuity and consistency on the various Stormwater Committees on which the SBCCOG has been asked to serve.
