TORRANCE
BEGINS NOVEMBER 6, 2013

Building Operator Certification helps building engineers, maintenance supervisors and others in the skilled trades advance their skills in energy efficient operation of commercial buildings

Since 1996 BOC® has advanced the performance of commercial buildings and the careers of building operators by providing a mix of classroom and hands-on training.

Enroll now to gain essential skills and a professional credential in energy efficient building maintenance. BOC training includes documentation of building equipment, systems and controls; benchmarking the building's performance; updating occupancy profiles; reviewing HVAC systems and operation; and mapping the facility's electrical distribution system.

BOC Level I training is for those with two or more years of experience in building operation and maintenance, who wish to broaden their knowledge of the total building system. BOC Level II is primarily for operators who have been certified at BOC Level I and who want more advanced training.
